PeopleLink Elite XL Series 30x Camera

PeopleLink Elite XL 30x is designed for activities such as work presentations and business negotiations, the camera features 1080P full HD telephoto lenses with 30x optical zoom, ensuring clarity at various distances. Equipped with AI automatic framing and humanoid tracking algorithms, the camera provides a professional and intelligent meeting experience without manual intervention.

Key Features

1080P Full HD

Utilizing a 1/2.8-inch, 2.07 million effective pixel HD CMOS sensor, these cameras achieve a maximum resolution of 1920×1080.

High-Quality Optical Zoom + HD Lens

Utilizes a high-quality ultra-high-resolution full HD telephoto lens with a maximum 30x optical zoom and a 60.7° horizontal FoV.

ISP Image Processing Algorithm

It uses ISP image processing algorithms to enhance white balance and automatic exposure functions, significantly improving the camera's image output. Widely applied in industries such as education recording, remote education, video conferencing, live streaming, and broadcasting.

Auto Focus

Incorporating advanced focusing algorithms, the lens achieves rapid, accurate, and stable focusing.

Key Features

Full Interface Low Latency

All video output interfaces meet low latency standards, supporting 4 simultaneous outputs, all capable of 1080P60.

AI Presenter Tracking

Equipped with in-house-developed ReID technology, the device identifies the speaker's figure, appearance, and outfit. As the speaker moves within the room, the camera automatically tracks them, ensuring the target remains centered. Even if there are interferences or the speaker exits the frame, the camera swiftly recaptures and tracks them upon reentry.

Support FULL NDI

Support FULL NDI, which allows the transmission of NDI-encoded videos. They are also backward compatible with NDI®|HX2 protocol, which requires lower network bandwidth and enables low-latency transmission of H.265/H.264 encoded videos.
